

FAASTeam presents:

## **Risk Management--Another FAA Buzz Word?**

Flying inherently has RISK. How we manage RISK is critical to flight safety. As the pilot in command, we are responsible for the conduct of the flight. During training we are introduced to managing emergencies but not so much to risk management. Risk management is a relative new term to GA (the military uses the term Operational Risk Management (ORM)). In this presentation, we will develop techniques and procedures to identify RISK, evaluate RISK, and manage RISK so we can conduct a safer GA flight.

**Directions:** Take Highway CA-99 to Exit 37 Lerdo Highway. Turn west on Lerdo Highway, turn right on Vultee Street, left on Minter Field Avenue, right on Aviation Street. Look for the new airport office building next to Johnson Propeller Services.

Fly-ins: Airport office is located on the southeast end of Shafter airport near runway 35. Plenty of parking just southeast of the run-up area for runway 35.

#### **A message from the National FAASTeam Manager**
